

Mobile ADR technological module according TPED directive 2010/35/EC

- For service of LPG tanks (helpful by tank defect, by cancelation of tank installation, tank periodical tests, etc.)
- Like temporary filling stations for the LPG bottles (hot-air balloons shows etc.)
- Like temporary LPG autogaz filling station
- Like temporary source of LPG gaseous phase without necessary building permit
- Many possible solutions ac. customers' requirements
- Easy and quickly manipulation with complete module

Base technical data and design:

- Tank water capacity 2.700-10.000 Litres
- Working temperature: -20°C/+50°C
- Working pressure 27 bar
- ADR tank code P27BH or P27BN
- Medium: propane, butane and mix propane-butane
- "Full frame" tank protection
- Stainless steel cabinets for equipment
- Full equipment ac. ADR requirements (bottom valves, level gauge, safety valves, etc.)
- Liquid phase mass flow metering system (on request)
- Gaseous phase mass flow metering system (on request)
- Compressor unit with hose reel and hose (on request)
- Painting: combination white colour tank and black colour for frame
